FINALIST OF THE
NZ HI-TECH AWARDS 2024

Erik & Jean's Story

The Kera sit2sit is the only device that allowed Erik and Jean to stay together in their own home.

Jean has MS and her husband, Erik, cares for her full time.

A hoist lift is too large and requires two caregivers to operate.

With the Kera, Erik can quickly and safely transfer Jean by himself and, they can stay together in their own home.
